

QA Solutions And Technical Support

For Development And Non Development Teams

Who we are

We are TechVerse Digital Solutions, a Quality Assurance company that helps development teams deliver their products on time.

With our help, our clients improve their product quality by eliminating risks when fixing bugs found by us in the development stage

They deliver faster releases with our help, maximizing their productivity.

Money is also saved, because bugs can cost you a lot if they reach production.

Money saved is money earned!

DID YOU KNOW ?

That we also can provide Technical Support ?

Technical Support

What we do

Testing and Quality Assurance
as we identify bugs before they reach production

Our Focus on:

Exploratory testing

We ensure that we find reproducible bugs before your application or new features go live.

Finding errors in logs

We log in to the application servers, debug and find related errors.

Functional testing

From analyzing specs to writing test cases to executing them, let us do the whole process.

Test case execution

Real time results with access to your testing resources.

Performance testing

We use different tools and automated processes to do performance tests on your application.

Acceptance testing

Certain tests are done so we can ensure that the specifications are met.

Regression testing

We run functional and non-functional tests to confirm that recent changes to the application did not affect existing features.

Troubleshooting

We check the use cases reported by the clients and find the core problem.

Technical Support Communication

We maintain a good relationship between the final client and the development team after reporting issues.

Our Goals

Improve product quality, productivity, Deliver faster and lower your expenses

Our Focus on:

Improve product quality and productivity

Eliminate risks by finding bugs in the development stage.

Deliver faster releases

By adding QA's to your team, you maximize your productivity.

Save money

Bugs can cost you a lot if they reach production. Let us help you to avoid this.

Why Us?

Our manual testing results in huge savings letting you release your software with full confidence

“We are a company specialised in helping other companies introduce testing into their workflow. We are well accommodated with dynamic environments where everything is urgent ... bugs are in abundance, exhaustion is at high peaks. This is where we come in, we take off the stress from development by creating manual or even automated tests.”

Test case implementation

We are specialized in creating and executing test cases

Save time and money

Our manual testing results in huge savings

5+ years of experience of QA

Every software company needs a quality assurance team to test their products before final release.

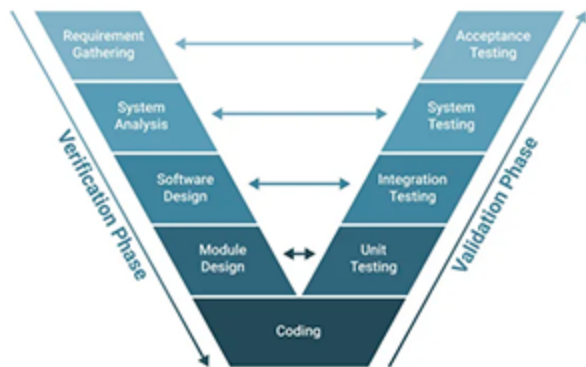

Obsessed with Quality

Techverse Digital Solutions is a way of preventing mistakes and defects in manufactured products and avoiding problems when delivering products or services to customers.

Test techniques include the process of executing a program or application with the intent of finding failures and verifying that the software product is fit for use.

Testing can also be helpful in reducing the risk of failures and errors, which can lead to loss of money, time, and resources.

Software testing is a crucial part of the software development life cycle.

AT YOUR SERVICE

"We're on a quest to create the best bug free software. Join us as we explore every inch of it. Let's find, fix and push..."

Software Quality Assurance

QA Services by us provides software project support that acts as an extension of your internal team. Our qualified and knowledgeable engineers work within your established processes and teams to help you meet project demands.

Technical Support

We also offer Technical Level 2 Support, also known as IT support, help desk or service desk where we are dealing with in-depth troubleshooting and backend analysis. Let us do the hard work!

OUR OFFER

Our team of experts will review your product or website to make sure it meets the highest quality standards. Unsure if your code/product is up to par?

Don't worry! We can also do a **FREE** audit to get the details.

Great Services

We offer a wide range of services, from quality assurance to customer service. We are here to help you with any problems you may have.
